REQUEST FOR CORRECTED FILING RECEIPT

Sirs:

A corrected filing receipt is hereby requested in view of an error which appears in the original; namely, the title is incorrect. For the convenience of the Patent and Trademark Office, attached is a photocopy of the original receipt on which the error has been noted in red. Also enclosed is the first page of the Specification indicating the correct title.

FILING RECEIPT

OC000000016064540

Date Mailed: 05/24/2005

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Battery pack and its charging/discharging method

Preliminary Class

320

Battery package and method charging and discharging the same.

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

DESCRIPTION

Battery Package and Method Charging and Discharging the Same

5 TECHNICAL FIELD

The present invention relates to a battery package comprising a secondary battery such as an alkaline storage battery, and a battery controlling method such as a charging and discharging method for effective use of the battery package. In particular, the invention relates to a method of controlling a
10 battery during charging and discharging the battery package comprising the secondary battery consisting of the alkaline storage battery such as a nickel hydrogen battery used in the battery package, as well as a method of making effective use of a capacity of the secondary battery contained in the battery package.

15

BACKGROUND ART

The remarkable progress in the technology of electronics in recent years has made possible downsizing and weight reduction of many electronic apparatuses, and it has resulted in a rapid advancement of cordless and portable operation of
20 the apparatuses. With the advancement of these apparatuses, there is an increased demand for small and lightweight batteries (i.e., storage batteries, or secondary batteries) of high energy density, useful as power supplies for the electronic apparatuses. These batteries have been used as power supplies of numerous products including power sources of electric tools, backup power
25 supplies, and the like. Nickel cadmium battery is one kind of these batteries (i.e., secondary batteries) that have been hitherto used widely as the power supplies. However, because of the increase in demand of high capacity, and
